V Hands-On Course Transoral Approaches in Oropharyngeal Surgery

18-19 December 2019

Hospital Universitari Germans Trias i Pujol
Universitat Autònoma de Barcelona

Germans Trias i Pujol
Hospital
Institut Català de la Salut

UAB

Universitat Autònoma de Barcelona

Minimally invasive oropharyngeal surgery has made important advances in recent years due to approaches using new technologies.

Knowledge of transoral inside out surgery is essential for correct indications and safe surgery.

The course is aimed at head and neck surgeons interested in expanding their knowledge of anatomy and improving their skills in these techniques.

Organizing Committee

David Virós Porcuna
Carlos Pollán Guisasola
Constanza Viña Soria
Laura Pardo Muñoz
Francesc Roca-Ribas Serdà

9.00-14.00 Cadaveric Dissection II

9.00-9.30. Theoretical lecture:
Transoral inside out oropharyngeal anatomy

9.30-13.00 Practical session:
Transoral endoscopic fresh cadaver dissection
Transoral Robotic surgery:
Fresh cadaver surgery with the Da Vinci Xi system

13.00-13.30 Theoretical lecture:
New possibilities: Transoral cervical approach (submaxilectomy, thyroidectomy), styloid process resection, maxillectomy, Zenker diverticulum

13.30-14.30 Practical session

14.30-15.30 Light Lunch

15.30-18.00 Cadaveric Dissection III

15.30-15.45 Theoretical lecture:
Local flaps (Bichat, FAMM, Palatine artery flap, Temporalis flap)

15.45-18.00 Practical session

8.00-10.00 Lectures:
Transoral surgery indications and instrumentation
Oropharyngeal carcinoma transoral surgery techniques
Oropharyngeal radiology
State-of-the-art and evolution of transoral robotic surgery

9.30-14.00 Live Surgery:
Transoral robotic surgery

14.00-16.00 Light Lunch
Transfer to Universitat Autònoma de Barcelona

16.00-19.30 Cadaveric Dissection I:
Formalin-fixed sagittal plane cut head.

16.00-16.15 Theoretical lecture:
Transoral inside out oropharyngeal anatomy

16.30-19.30 Practical session

21.30 Official dinner
